PROFESSIONAL SUMMARY

AI & Data Science undergraduate and published AI researcher with hands-on experience across Machine Learning, Computer Vision, and Generative AI. LLM Post-Training Intern with proven ability to evaluate, optimize, and validate large language model outputs against human-feedback guidelines. Skilled in building end-to-end AI applications and deriving actionable insight through data analytics. Driven to apply cutting-edge AI research to solve real-world problems at scale.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2024 – 2028

Sanjivani University

Relevant Coursework: Machine Learning, Artificial Intelligence, Deep Learning, Computer Vision, Natural Language Processing, Database Management Systems, Statistics

Senior Secondary (Science) — Maharashtra State Board

2024

Sai Nirman Junior College | Percentage: 63.67%

EXPERIENCE

LLM Post-Training Intern — Ethara AI

Feb 2026 – May 2026

Virtual

- Evaluated and validated Large Language Model (LLM) outputs for accuracy, relevance, consistency, and safety in accordance with human feedback guidelines.
- Developed and refined structured datasets through systematic data preparation and annotation to support LLM post-training workflows.
- Optimized model response quality by conducting rigorous prompt evaluation and iterative feedback analysis.
- Collaborated with a distributed remote team to consistently deliver evaluation deliverables ahead of deadlines.

TECHNICAL SKILLS

Programming: Python, SQL, C++, R

AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Large Language Models, Scikit-learn

Data Analytics: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Tableau

Libraries: OpenCV, MediaPipe

Tools: Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

AI Sign Language Interpreter

Python, OpenCV, MediaPipe, Computer Vision

- Developed a real-time sign language interpreter that converts hand gestures into speech and text output.
- Optimized frame-processing pipeline to minimize latency and enable smooth real-time translation.
- Improved accessibility for hearing- and speech-impaired users through computer vision-based gesture recognition.

AirBlocks – Gesture-Based 3D Modeling System

Python, OpenCV, MediaPipe

- Built a gesture-controlled virtual 3D modeling application, implementing real-time hand tracking to let users create, resize, move, and manipulate virtual blocks.
- Designed a grid-based spatial interaction system to enable precise, intuitive object manipulation without physical hardware.
- Optimized real-time gesture recognition pipeline, reducing latency and improving tracking accuracy.

MeetMate – AI Meeting Assistant

Python, NLP

- Developed an AI-powered meeting assistant that analyzes user preferences to recommend optimized meeting times.
- Implemented NLP-based recommendation logic to automate scheduling decisions and reduce coordination overhead.

RESEARCH & PUBLICATIONS

- Co-authored an AI research paper published in JETIR (Journal of Emerging Technologies and Innovative Research).

- Presented research work at TEKCLUSTER'25, a National Level Technical Symposium.

CERTIFICATIONS

- Tata Group – GenAI Powered Data Analytics Job Simulation
- Deloitte – Data Analytics Job Simulation
- IBM – Business Intelligence
- IBM – DevOps, Agile & Design Thinking
- MongoDB – MongoDB For Students
- CognitiveClass – SQL and Relational Database 101
